# MARIJUANA MASTERCLASS

Cannabis has become a \$21 billion dollar industry in a relatively short period of time.

**With over 200 publicly-traded cannabis investments, how do you figure out which will go high or up in smoke.**

Although cannabis has not been legalized at the federal level, states where it's legal are cashing in.

I've done the research, so you can make the money. Here's what we'll cover in the Masterclass.

## part 1

### **Bank with Brokerage Basics**

Types of financial institutions allow you to purchase cannabis

Account types are available to you when purchasing cannabis investments

OTC may or may not be the way to go with investing

## part 2

### **From Munchies to Medicinal**

Investment opportunities in medicinal and recreation

Various sub-categories across the cannabis industry to help you diversify

Uncover companies that are not directly a part of the cannabis industry, but are profiting from it

## part 3

### **Penny stocks w/ Profit Potential**

Penny stocks that may position you for explosive growth

Financial indicators to help you identify them on your own

Minimize your risk in OTC picks to help protect against "pump & dump" schemes

**Investment products are: Not FDIC insured | Not bank guaranteed | May lose value**
